

**IN A BIND**

Or

**Practical commercial splints**

# Conflicts

- Bryan serves on the board of the OSMS. The board offered \$00.00 for this presentation. He demanded at least triple that. They declined to change the reimbursement. He has not recovered emotionally.
- Both of us offered to prostitute ourselves to any of the splint companies but they also refused to pay.

- Doug Campbell, MD, the younger and hairier brother, is a family physician in private practice in Prescott, Az. He has worked in Emergency settings, outpatient clinics, the Grand Canyon medical clinic. He is also a long time leader in the Boy Scouts.
- Bryan Campbell, MD, the better looking of the brothers, is a full time faculty member of the McKay Dee Family Medicine Residency in Ogden, UT. He was a deputy medical director of the Snowbasin venue 2002 Olympics and continues to work in the Snowbasin Ski Resort clinic. He too has served long as a Boy Scout leader.

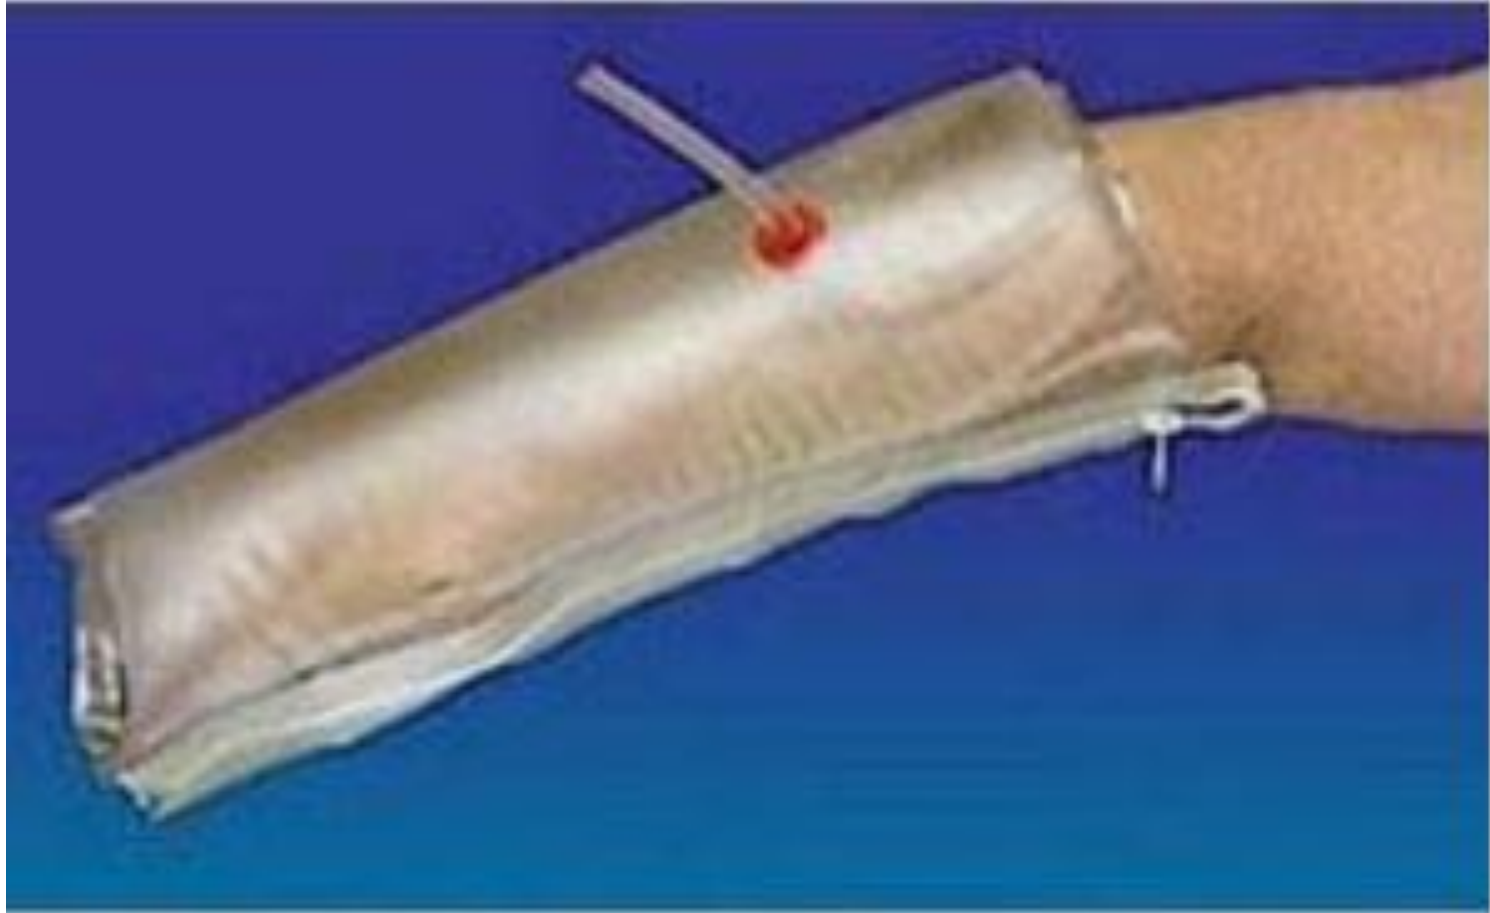

I'M GONNA NEED  
MORE TAPE.

# Lots of options

# Inflatables

# *Prosplints*®

---

## **All the support you'll ever need.**

EMT's and athletic trainers from across the country have found Prosplints to be the finest splinting system available. This is no surprise since your input helped MED SPEC design the industry's most advanced splint line.

At the scene of an accident, timing is critical. When a splinting device is necessary, the splint you reach for should be simple to apply, while helping ease your patient's discomfort. MED SPEC Prosplints for adults and Semi-Prosplints for children are fast, effective, and performance proven in thousands of emergency applications.

With tight time restraints, you need splints that are quick and easy to apply. MED SPEC Prosplints offer you this and more at a very economical price. Select the features link below to learn more.
