*58-37-6.5 continuing education for controlled substances prescribers

Overall Program Objectives

At the completion of the medical conference, attendees will have a better idea of how to treat, manage, and educate their patients by:

1. Addressing pearls from specialty medicine (and when to refer) concerning hyperbaric oxygen therapy & wound care; a hospitalist; a colorectal surgeon; weight loss or bariatric surgery; cardiologist prevent guidelines; tele emergency medicine; hand surgery; autism; current testing guidelines for colon cancer - colon cancer detection and prevention; what's new in the diagnosis & treatment of venous thromboembolism; ENT; and dermatopathology (mole problem pearls for the primary care clinician).
2. Identifying current medical issues (and when to refer) concerning adult dermatology; 10 things a nephrologist wished that a primary care clinician knew; pathology, AI, and population health; dermatitis and contact dermatitis for the primary care provider; public health measures to combat the rise of congenital syphilis; and long covid.
3. Providing education of interest concerning humanism in medicine and proposes strategies by which patients, their families, and medical practitioners can better address human needs before, during, and after serious illness; Radiating Hope: A Non-profit for Global Cancer & Support; the future of medicine; physician burnout; Dermoscopy: skin cancer; pediatric dermatology; and Utah & the Artificial Heart: Impact and Reflections 40 Years Later from Barney Clark's Cardiologist.
4. Completing an opioid education CME course to fulfill the Utah DOPL prescription licensure.
5. Completing a medical cannabis course Medical Cannabis: Law Update and Best Practices for Safe Use of Medical Cannabis.
6. Experiencing hands-on performance lab skills concerning skin Biopsy, ER ultrasound devices, BLS recertification, and PALS recertification.
7. Identifying resident quality improvement project lectures and posters.
8. Addressing the current medical issues, and through review or integration of new or improved discoveries of current medical issues, improve competence and performance in clinical practice for patient care.
9. Identifying recent changes in healthcare laws and policies from the update of the recent Utah legislature from the UMA perspective as well as economic & policy Issues affecting patients with kidney disease. With this information, it is important to discuss the impact on the medical practice and practitioner.
10. Enhancing competence and performance skills of the interdisciplinary team to improve care of patients needing primary and/or specialty care. The intent is to facilitate productive, collegial action between the medical team, including physicians, physician assistants, nurses, nurse practitioners, social workers, and first responders.

over the course of a lifetime • **1 in 7** American adults has KD, and most don't know it •
Americans (**1 in 10**) have diabetes • More than **249,100** people are currently living with kidney
disease • KD kills over **113,000** Americans every year—more than breast and prostate cancers
Early detection and treatment can slow or prevent the progression of KD • Of the over
10 million Americans with kidney disease, fewer than 25,498 people receive one each year • Every day, over **18 people**
518,970 Americans are on dialysis and more than **201,874** live with a functioning kidney
disease • **10.28**—second only to cancer • Over **120 billion** US health care dollars are spent annually
